01

Aya is married and has two children. She peels garlic and do manicure. Today, Aya wakes up first, prepares the breakfast. She checks how much money she has left: 60 PhP

02

She gives 13PhP for baon and 2 PhP for candies to each of her children to buy lunch, total is 30 PhP

03

and 20 PhP to give to teacher as school project.

04

She kept 10 PhP at home and then she meets 3 customers and earns 50 PhP for each, so 150 PhP in total

05

She arrives at the market and she buys rice (1 kg for 40 PhP), fish for 25 PhP and banana (1 tumpok for 10 PhP)

06

and she buys 2 bottles of cutix : 40 PhP

07

She repays her utang that she took for a towel : 5PhP per day during one month (towel price is 100 PhP but she will pay 150PhP at the end...)

08

At the market, she sees a friend. They both look at very nice fabric to make clothes. The man is very convincing. They negotiate and she gets a good deal: 20 PhP. She will make a skirt for her and a dress for her daughter.

09

On the way home, she discovered she has no more money and she asks a friend for 10 PhP to buy some water

10

Once home, she discovers her husband took the 10 PhP and bought a pack of cigarettes.

11

Aya is stressed: she has no money left to give to the children tomorrow morning. She needs to pay 50 PhP for the electricity tomorrow. She remembers earning 40 PhP from garlic but she is not sure where the rest of the money went. And she owes 10 PhP to one of her friend and 5 PhP for the utang for the towel
