

## Phased-out Survey Assessment Questionnaire

*(to be done one year after the end of the follow-up).*

The goal of this survey is to assess the sustainability of the progress made by the family during the follow-up and his ability to make progress on her own.

**BEFORE** the Phased-out survey, the Family Counselor will **print the family card** of the family and **check all the objectives**

This guideline questionnaire has to be filled up after the interview and not in front of the family :

**Name of the family:**

**Date of the Assessment:**

**Who is interviewed?**

**Who is present?**

**AFTER** the phased out survey, the Family Counselor needs to fill :

- For EACH objectives, the result during the Phased-out survey**, this has to be written on the family card, in front of each objective.
- The levelling form**
- The Phased-out tool** (the same as the one used at the end of the follow up)
- A brief and general assessment of the family, **including quotes of the family itself**

To undergo the general assessment of the family, the Family Counselor could ask some of the following questions :

**What are the major improvements that happened during the period of visit from Enfance?**

**What are the positive changes that happened in your life since Enfance stopped visiting you?**

**What are the negatives changes that happened in your life since Enfance stopped visiting you?**

**How did you handle the problems that you encountered?**

**On what things do you think we could improve on ? (as an organization and as family counselor ?)**
